then join the SERTUC rally in Congress House starting at 12 noon

JOIN THE MARCH!

Bankers and their greedy system caused this crisis.

Now they want working people to pay their debt by:

- **Cutting our jobs and public services**
- **Slashing our welfare benefits and pensions**
- **Privatising our NHS, schools and Royal Mail**

This Government of millionaires say 'we're all in this together' – but what do they know about what it's like to struggle on low pay or on benefits?

They say they have no choice but to cut. Don't believe them. Their cuts won't only destroy jobs and services - they'll also make the recession even worse.

We say there is an alternative - investing in housing, schools and public transport, not renewing Trident missiles, making sure that the rich are made to pay the £120bn that they avoid paying in taxes every year.

What future do we face if we allow the ConDems to get away with this savagery?

We say:

- **Unite trade unions and anti-cuts campaigns to defend all jobs and services.**
- **Support trade unions like RMT and FBU currently organising action to save our services from slaughter.**
- **Build the TUC Week of Action as a step towards a massive national demonstration and joint union action.**
- **Help to build vibrant local anti-cuts campaigns in every borough.**

If you need a speaker to help win support for the demo in your workplace, community campaign, school or college please get in touch.
