

NO MORE POLICE DIRTY TRICKS

DEFEND DEMOCRATIC RIGHT TO PROTEST

In the last weeks there have been revelations about police spies being asked to dig for dirt on the bereaved Lawrence family, infiltrating anti-racist and left organisations, and even having children with protestors. Youth Against Racism in Europe (YRE) has initiated a protest at Scotland Yard. We call on all those who are horrified by the revelations to join us.

We are demanding:

- A genuinely independent public inquiry into the 'infiltration scandal' made up of democratically-elected representatives from the trade union movement and the anti-racist and environmental protest groups that have suffered infiltration
- The abolition of the Territorial Support Group and other similar units
- The abolition of the Special Branch, including the national public order intelligence unit and the destruction of political files and computer records not connected with criminal investigations
- For repeal of all laws that trample over civil liberties, including the anti-trade union laws.

Lobby of Scotland Yard
