

Build an anti-austerity movement

Local authorities have had their funding slashed by Government. Labour Councils say that they therefore have to make 'difficult choices' to cut services for vulnerable people. We say **NO YOU DON'T**. We support Jeremy Corbyn's call for Councillors to resist austerity. Councillors must refuse to pass on Tory cuts. A powerful alliance of 'rebel councils' with trade unionists and service users could demand the resources we need.

Socialism is the key

There is plenty of wealth in the UK. The richest 1000 people doubled theirs' in the last 10 years - an increase of **£250 billion**. It's all about who owns and controls it. If we want keep running the economy as a Casino, then we have to keep the punters happy, which means permanent austerity. If we want to banish poverty, exploitation and violence, then we have to take it out of the hands of the super - rich.

For women and children escaping violence - cuts kill. Access to refuge places, social housing, legal representation and income make all the difference when it comes to deciding whether to get out of an abusive situation. Yet, whilst MPs claimed a total of £103 million in expenses in 2014, funding for specialist DV services, including a 24 hr helpline, was restricted to £40 million. **It's all about priorities.**
