

**C**elebrate May Day by sending greetings to the Socialist this year.

Because if we're to banish the Tories and Blairites for good, and end the billionaires' world austerity barrage, workers and young people need socialist ideas and solidarity in the fightback.

May Day greetings help fund the newspaper which exists to spread them.

Globally, the capitalist establishment has been rocked by mass popular uprisings. In Britain, the need for organised workers' action against the Tories couldn't be clearer.

Which paper details a fighting industrial strategy to beat the anti-union laws? Who explains how councils can set budgets that defy the Tory cuts? Where can you read about the practical programme needed to reconstitute a mass party for working-class political representation?

The Socialist. We report and discuss strategy for the strikes and struggles the bosses' press smears or ignores.
