May Day greetings 2020

May Day is a time when we express international solidarity with all sections of the world workers' movement. And the Socialist newspaper consistently champions trade union, community and social struggles. It covers the stories the capitalist media ignores or misrepresents – and puts forward a fighting analysis and strategy. In this time of capitalist chaos, combative ideas and the struggle for a socialist alternative are more important than ever. Help us support the paper that fights for workers and young people. Help us send May Day greetings to the Socialist this year!
